AK, DE, IN, KS, MD, NV, NC, OH, PA, SC, TX, WDC

FEEDING OUR STUDENTS
New in '21, Child Nutrition Management System: VT

Featuring:

- Data and audit consistency for staff, reviewers, and management
- Easy integration with both legacy and future systems through web services and/or direct data connection (has been integrated with nine distinct UI Tax systems)
- Built-in management reports
- Assignment/case management repository for file retention
- Integrated workflow and assignment tracking
- Flexible and intuitive design; effective for both new and experienced staff
- Generated correspondence specific to assignment type and SWA requirements
- Ability to attach supporting documentation
- Support of data import/export via CSV or Microsoft™ Excel files
- Assignment/Case review package created as PDF upon approval

For UI Tax Audit:

- Continuous TPS and Best Practice Quality edit checks
- Onsite use at the employer while disconnected from the agency's network
- 25+ Built-in management reports, plus a data warehouse for ad-hoc management analytics including Desired Levels of Achievement (DLA) Progress monitoring
- Robust Employer Selection process with options matured from working with eight SWAs since first implementing for Maryland in 2013
- Built-in TPS Review process to allow the agency TPS team to securely review and score the annual Audit Universe audits within COMPAS — isolated from the audit staff through security

For Paid Family Leave Tax Audit:

- UI Tax Audit functionality adapted to provide the same robust features for PFL auditing

For Benefits Accuracy Measurement (BAM):

- Leverage of the standard SUN system "rec1.dat" file to create weekly BAM assignments
- Import of additional DCI "Before" data from the UI Claim
- Investigation Worksheets specific to the four case types (PCA, DCA-MON, DCA-SEP, and DCA-NS)
 - Supported Alternate Base Period analysis for monetary eligibility
 - Continuous Quality Checks based on the ET400 BAM Operations Guide edits
- Automated DCI Results determined as the details and answers are entered on individual worksheets

sharing a common
and robust
UI Audit Tool.*

"Alaska BAM has utilized COMPAS as its primary auditing tool for the last several years. During this time, MTW has been responsive and easy to work with. Auditors navigate and store investigative information in COMPAS which has resulted in more complete audits. As a BAM manager, one of the perks of COMPAS is when reviewing cases, all the information is in one audit report and easy to find and you receive notifications as auditors submit the cases which allows for easier tracking."
